

## Task-1

### 1 Greeting Component (`Greeting.js`)

```
import React from "react";

function Greeting() {
  return <h1>Hello, World!</h1>;
}

export default Greeting;
```

### 2 Modify Greeting to Display "Hello, React!"

```
function Greeting() {
  return <h1>Hello, React!</h1>;
}
```

---

### 3 Gallery Component (`Gallery.js`)

```
import React from "react";

function Gallery() {
  return (
    <div>
      
    </div>
  );
}

export default Gallery;
```

---

### 4 Add Greeting to Gallery

```
import React from "react";
import Greeting from "../Greeting"; // Import Greeting

function Gallery() {
  return (
    <div>
      <Greeting /> {/* Display the greeting */}
      
    </div>
  );
}

export default Gallery;
```

---

### 5 Profile Component (`Profile.js`)

```
import React from "react";

function Profile() {
  return (
    <div>
      <h2>User Profile</h2>
      <p>Name: John Doe</p>
      <p>Age: 25</p>
    </div>
  );
}

export default Profile;
```

---

## 6 App Component (App.js)

```
import React from "react";
import Gallery from "../Gallery"; // Import Gallery
import Profile from "../Profile"; // Import Profile

function App() {
  return (
    <div>
      <Gallery />    {/* Display Gallery (with Greeting inside) */}
      <Profile />    {/* Display User Profile */}
    </div>
  );
}

export default App;
```
