

Step 1: Create `FavoriteFruits.js` (Unordered List of Fruits)

src/FavoriteFruits.js

```
javascript
CopyEdit
import React from "react";

function FavoriteFruits() {
  return (
    <div>
      <h2>My Favorite Fruits</h2>
      <ul>
        <li>Apple</li>
        <li>Banana</li>
        <li>Mango</li>
      </ul>
    </div>
  );
}

export default FavoriteFruits;
```

Step 2: Add Fruit Images to `FavoriteFruits.js`

Updated `src/FavoriteFruits.js`

```
javascript
CopyEdit
import React from "react";

function FavoriteFruits() {
  return (
    <div>
      <h2>My Favorite Fruits</h2>
      <ul>
        <li>
           Apple
        </li>
        <li>
           Banana
        </li>
        <li>
           Mango
        </li>
      </ul>
    </div>
  );
}

export default FavoriteFruits;
```

Step 3: Create `WebsiteLink.js`

src/WebsiteLink.js

```
javascript
CopyEdit
import React from "react";
```

```
function WebsiteLink() {
  return (
    <div>
      <h2>Visit My Favorite Website</h2>
      <a href="https://www.example.com" target="_blank" rel="noopener noreferrer">
        Click Here
      </a>
    </div>
  );
}

export default WebsiteLink;
```

Step 4: Create a Blog Post Component

src/BlogPost.js

```
import React from "react";

function BlogPost() {
  return (
    <div>
      <h2>The Future of JavaScript</h2>
      <p>
        JavaScript is evolving rapidly with new features, frameworks, and best
        practices emerging every year. Developers must keep up with the latest trends.
      </p>
      <p><strong>Author:</strong> John Doe</p>
    </div>
  );
}

export default BlogPost;
```

Step 5: Create a Footer Component

src/Footer.js

```
javascript
CopyEdit
import React from "react";

function Footer() {
  return (
    <footer>
      <p>&copy; 2025 My Website. All rights reserved.</p>
    </footer>
  );
}

export default Footer;
```

Step 6: Combine Everything in App.js

src/App.js

```
javascript
CopyEdit
import React from "react";
```

```
import FavoriteFruits from "../FavoriteFruits";
import WebsiteLink from "../WebsiteLink";
import BlogPost from "../BlogPost";
import Footer from "../Footer";

function App() {
  return (
    <div>
      <FavoriteFruits />
      <WebsiteLink />
      <BlogPost />
      <Footer />
    </div>
  );
}

export default App;
```

Step 7: Render Everything in `index.js`

src/index.js

```
import React from "react";
import ReactDOM from "react-dom";
import App from "../App";

ReactDOM.render(
  <React.StrictMode>
    <App />
  </React.StrictMode>,
  document.getElementById("root")
);
```
